

John Please
Fix this one
to turn like
the other and
mend the top
cap. E. J.

J. A. Edison

Feb 12, 1881

gohrd 7/11

Electric Motor.
 An iron core suspended in
 a helix, as the current
 varies so will the magnetic
 attraction vary tilting the
 beam up or down
 shunting the current
 from one pole to the
 other on conical
 paper
