

Index for Conclusions and Summary Report

Part I

	Page No.
Introduction	3
Summary of Conclusions	1
Summary Report	6
Questions Laid Before Sir Adam Beck	6
Interviews with Premier Drury and Hon. Peter Smith	7
Origin of the Hydro Movement	7
The Growth of Hydro Service	8
Water Power Development in Ontario and Quebec	8
Power Plant Capacity Constructed by Hydro	9
The "Clean-Up Deal"	9
The Hydro-Electric Power Commission	9
Investments Controlled by Hydro	9
The Powers of the Hydro-Electric Power Commission	9
Contrast Between Hydro and Commission in U. S.	10
Advantages Taken of Power Commission Act	10
The Function of the Hydro-Electric Power Commission	10
The Province's Commitments to the Power Companies at Niagara Falls	10
The Faith of the People in the Hydro-Electric Power Commission	11
Taxes in Ontario and Quebec Compared	11
Taxes in Ontario	11
Taxes Received from Electric Utilities	12
The Queenston-Chippawa Development	12
Engineering Reports on Queenston-Chippawa Development	12
Water Available for the Queenston-Chippawa Development	13
Estimated Construction Cost of Queenston-Chippawa Development	13
Estimated Cost of Power from Queenston-Chippawa Development	13
The Results from the Queenston-Chippawa Development	15
The Nipigon Development	15
The Cost of Power from the Nipigon Development	15
Power Available to the Thunder Bay District	15
Hydro-Electric Power Commission's Rate Structure	15
Power at Cost	16
Rate Methods Applied in Ontario and California	16
Result of Hydro Rate Methods	16
Comparison of Wholesale Interim and Actual Rates	16
One Price for Power	16
Rate Discrimination in Ontario	17
Theory of Government Ownership	17
Sections Selected for Comparison	17
Relief from Taxes	18
Power Costs in Quebec and Ontario	18
Power Costs from Government and Private Electric Utilities in Canada	18
Average Cost of Power to the Ultimate Consumer	18
The Niagara Power Districts in Canada and United States	19
California Compared to Ontario	19
Quebec Compared to Ontario	19
Lower Average Prices to Consumers of Private Companies	19
Power Costs in Toronto, Buffalo and Montreal	20
The Cost for Street Lighting in Toronto, Buffalo and Montreal	20
Industrial Consumers in Ontario Carry the Burden	21
The Relation of Capital Expenditures to Revenue	21
Un-uniform Power Costs in Ontario	21

Part II—Index for Sections

Section	Title	
A	Correspondence between Mr. W. S. Murray and the electric utility companies, the Hydro-Electric Power Commission of Ontario and Officials of the Province of Ontario	23
B	Origination and growth of the Hydro-Electric Power Commission of Ontario	41
C	Laws in respect to the authority of the Hydro-Electric Power Commission of Ontario, and the relation of the Province and Municipalities to the Commission	67
D	The cost of power to the people of Ontario served by the Hydro-Electric Power Commission	82
E	Indebtedness, assessments and taxes in the Provinces of Ontario and Quebec	110

MURRAY AND FLOOD REPORT—INDEX

Section	Title	Page No.
F	The Queenston-Chippawa Development for the Niagara System of the Hydro-Electric Power Commission of Ontario	127
G	The Nipigon Development for the Thunder Bay System of the Hydro-Electric Power Commission of Ontario	143
H	Rates for power to the people of Ontario using Hydro-Electric Power Service, and comparison of the rate-making method employed by the Hydro-Electric Power Commission with those of the California Railroad Commission	154
I	Comparison in respect to the cost for power to the people of the Provinces of Ontario and Quebec, and for certain sections of the United States	182

Index of Plates

Plate	Section	Title	Page No.
1	B	General map of the physical structure of the Hydro-Electric Power Commission of Ontario	65
2	H	Hypothetical Electric Utility System for demonstration of rate making methods employed by the Hydro-Electric Power Commission and the California Railroad Commission	157
3	H	Interim rates per horsepower for wholesale power charged to Municipalities by Ontario Hydro-Electric Power Commission	161
4	H	Wholesale cost of power in 1920 to the Municipalities in the Niagara Peninsula of Ontario	165
5	I	Districts served from Niagara Falls in the United States and Canada	187

Index to Figures

Figure No.	Section	Title	Page No.
1	B	Estimates with respect to the cost of power compared to the actual cost paid for the Niagara System, on a 30,000 horsepower basis	43
2	B	Estimates with respect to the cost of power compared with the actual cost paid for the Niagara System, on a 100,000 horsepower basis	45
3	B	The total population of Ontario with the population of the districts served by the Hydro Systems and the number of Hydro consumers	47
4	B	The service performed by Hydro for the people of Ontario	49
5	B	The growth of water power development per capita in the Provinces of Ontario and Quebec	51
6	B	Relation of generating capacity owned by the Hydro-Electric Power Commission to the peaks upon the systems served	57
7	B	Actual Load Curve of the Hydro-Electric Power Commission of Ontario exclusive of the Thunder Bay and Ottawa Systems for the years 1919 and 1920	61
8	D	Relation of the liabilities of the Hydro-Electric Power Commission to the liabilities of the Province of Ontario	83
9	D	The wholesale cost for power to Municipalities for the several systems, and to companies served directly by the Hydro-Electric Power Commission in 1920	91
10	D	Relation of "cost of power" and transmission cost to the total wholesale cost for power delivered by the Hydro-Electric Power Commission to Municipalities of the Niagara System from 1919 to 1920	95
11	E	Taxes and expenses compared for the Provinces of Quebec and Ontario in 1919 as derived from the report of the Dominion Bureau of Statistics—per capita basis	111
12	E	Taxes and expenses compared for the Provinces of Quebec and Ontario in 1919, as derived from the report of the Dominion Bureau of Statistics—mills per dollar of taxable property	113
13	E	Taxes, Bonded Debt and Sinking Fund per capita for all Municipalities of 25,000 or less inhabitants in the Province of Ontario	117
14	E	Taxes, Bonded Debt and Sinking Fund in Mills per Dollar of Assessed Valuation for all Municipalities of 25,000 or less inhabitants in the Province of Ontario	119
15	E	The taxes which would be paid by the Government Electric Utilities of Ontario were their operations charged with taxes at the rates paid by private companies in the United States and Canada. Based on the relation of taxes to revenue	123
16	E	The taxes which would be paid by the Government Electric Utilities of Ontario were their operations charged with taxes at the rates paid by private companies in the United States and Canada. Based on the cost of taxes per kilowatt hour	125
17	F	Estimates and costs for power chargeable to the Municipalities of the Niagara System at busses of generating plants at Niagara Falls	141

MURRAY AND FLOOD REPORT—INDEX

Figure No.	Section	Title	Page No.
18	G	The power plant capacities available to the people of the several systems served by the Hydro-Electric Power Commission	151
19	H	Totals of the average horsepower taken in 1920 by the Municipalities for each zone segregated into systems	167
20	H	The retail cost of power to consumers compared to the actual wholesale cost, and to the interim wholesale rates charged by the Hydro-Electric Power Commission to the Municipalities in 1920	171
21	H	Base retail power rates for several Municipalities on the Niagara System for 1920	175
22	H	Base retail power rates for several Municipalities on the Hydro-Electric Power Commission Systems other than the Niagara System for 1920	177
23	H	Base retail power rates for Niagara Falls, Ontario, compared to those of Hamilton, Ontario, in 1920 and 1921	179
24	I	Comparison between the Niagara Power Districts of Canada and the United States of revenue, relation of Hydro-Electric to total generating capacity and energy generated per capita	191
25	I	Comparison between the Ontario Government Electric utilities exclusive of power exported to the United States and private electric utility companies in California	193
26	I	Comparison between the Ontario Government Electric utilities exclusive of power exported to the United States, Ontario private electric utility companies and Quebec private electric utility companies of revenue, relation of Hydro-Electric to total generating capacity and energy generated per capita	195
27	I	The total revenue less taxes per kilowatt hour sold for the City of Buffalo and Montreal compared to Hydro in the City of Toronto	199
28	I	The revenue less taxes per kilowatt hour for the cities of Buffalo and Montreal compared to the city of Toronto, including both the municipally owned and privately owned electric utility properties	201
29	I	The average cost for street lighting in the city compared in annual cost per capita for Toronto, Buffalo and Montreal	203
30	I	Comparison of revenues from different classes of business for Toronto Hydro and the City of Buffalo	205
31	I	Comparison of energy sold for domestic and commercial lighting by the Toronto Hydro-Electric System and the City of Buffalo	207
32	I	Relation of the City of Toronto to the Niagara System as to population and ratio of horsepower taken	209
33	I	The annual load factor compared for the City of Buffalo, the Toronto Municipal System and for all electric utilities in Toronto	211
34	I	Street lighting revenue per capita compared by population groups for 44 Municipalities in the Province of Quebec and 39 Municipalities in the Province of Ontario	213
35	I	Population per 100 watt street light compared by population groups for 44 Municipalities in the Province of Quebec and 39 Municipalities in the Province of Ontario	217
36	I	The proportion of revenues expended on capital additions for American companies in the Niagara District, Quebec companies of the St. Lawrence Valley, Hydro-Electric Power Commission, Municipal Hydro Commissions and complete Hydro System	219

Index to Tables

Table No.	Section	Title	Page No.
1	B	Capacity and characteristics of the operating power plants owned by the Hydro-Electric Power Commission in 1919	55
2	D	The total investments in physical assets of the Hydro-Electric Power Commission, and of the Province of Ontario and the Municipalities therein in electric utility systems for 1920	87
3	D	Investments by the Hydro-Electric Power Commission in physical assets on behalf of the Municipalities by systems as of October 31, 1920	88
4	D	Investments and physical assets by the Municipalities in distribution systems, on their own behalf as of December 31, 1920	89
5	D	Investments in facilities of governmental electric utilities for 1920 in dollars per horsepower purchased, and in cents per kilowatt-hour generated or purchased	90
6	D	The wholesale cost for power from the Hydro-Electric Power Commission of Ontario to the several Municipalities by systems as of October 31, 1920	94
7	D	Comparison of production costs for the Ontario Power Company under private and governmental management	98
8	D	The annual expenses for operating the Ontario Power Company and of purchasing additional power for the Niagara System in 1919 and 1920	100
